SOFTWARE ENGINEERING PROJECTS

ADMIN_DASHBOARD_APP | @[BAS DELIVERY](#)

It is a realtime dashboard app belonging to Bas delivery company for managing orders by delivering it for restaurants by this app.
ROLE:
- Software Engineer(Full stack)

TECHNOLOGIES:
- *socket.io, Nodejs, express, postgresql, react, redux.*

Responsibilities:
- working on improving code coverage and performance.
- solving bugs to improve the speed of the application.
- adding new features and writing clean code to help with readability and scalability.

Achievements:
- The app has been more stable.
- The project revenue has increased.

SYNCFUSION-DASHBOARD | [liveDemo](#) | [Github](#)

react, react-router, syncfusion
- I created this app as a react admin dashboard with Theming, Tables, Charts, Calendar, Kanban and More.

WOULD-YOU-RATHER | [liveDemo](#) | [Github](#)

react, react-router, TypeScript, RTK, materialUI
- I have created this app as a game puzzle with TypeScript by leveraging it with Redux ToolKit .

MY-READS | [liveDemo](#) | [Github](#)

react, react-router
- I have used an external API and categorized the books into three shelves along with a friendly UI.

MEMORIES | [liveDemo](#) | [Github](#)

react,react-router,redux-thunk,materialUI
- I implemented various concepts of react and managed the state using redux and materialUI made an awesome view.
